Not Guns

Children's Defense Fund 2008

Firearm Deaths Among Children and Teens Increase for the First Time Since 1994: 3,006 in 2005

A ccording to the most recent data from the Centers for Disease Control and Prevention, 3,006 children and teens were killed by firearms in 2005, the first increase since 1994 and the first rise in gun deaths since Congress allowed the Assault Weapons Ban to expire in 2004.

When 32 people were killed at Virginia Tech and five at Northern Illinois University, the public was outraged. Yet every four days we have the equivalent of a Virginia Tech tragedy that passes unnoticed. Our gun violence epidemic robs parents of their children, wastes our human potential, and drains resources from our health care system.

What is it going to take for us to stop this senseless loss of young lives? We need to ensure that those we elect to public office enact legislation that will really protect children by limiting the number of guns in our communities, controlling who can obtain firearms and the conditions of their use. Individuals and communities must act to end the culture of violence that desensitizes us, young and old, to the value of life.

We cannot allow these shots to go unheard. Our children and our society deserve no less.

- **The number of children and teens in America killed by guns in 2005 would fill 120 public school classrooms of 25 students each.**
- **In 2005, 69 preschoolers were killed by firearms compared to 53 law enforcement officers killed in the line of duty.**
- **Since 1979, gun violence has snuffed out the lives of 104,419 children and teens in America. Sixty percent of them were White; 37 percent were Black.**
- **The number of Black children and teens killed by gunfire since 1979 is more than 10 times the number of Black citizens of all ages lynched in American history.**
- **The number of children and teens killed by guns since 1979 would fill 4,177 public school classrooms of 25 students each.**

The latest data from the U.S. Centers for Disease Control and Prevention show that 3,006 children and teens died from gunfire in the United States in 2005—one child or teen every three hours, eight every day, 58 children and teens every week.

1,972 were homicide victims
822 committed suicide
212 died in accidental
or undetermined circumstances

2,654 were boys
352 were girls

404 were under age 15
131 were under age 10
69 were under age 5

1,624 were White
1,271 were Black
614 were Latino*
60 were Asian or Pacific Islander
51 were American Indian or Alaska Native

More than five times as many children and teens suffered non-fatal gun injuries.

* Persons of Hispanic/Latino origin can be of any race; these 614 deaths are included in the four race categories.

Did You Know?

- 181 more children and teens died from firearms in 2005 than in 2004—the first annual increase since 1994.
- 168 more children and teens died from homicide in 2005 than in 2004.
- 56 more White, 122 more Black, 40 more Hispanic, and 9 more Asian and Pacific Islander children and teens died in 2005 than in 2004.
- More 10- to 19-year-olds die from gunshot wounds than from any other cause except motor vehicle accidents.
- Almost 90 percent of the children and teens killed by firearms in 2005 were boys.
- Black children and teens are more likely to be victims of firearm homicide. White children and teens are more likely to commit suicide.
- The firearm death rate for Black males ages 15 to 19 is more than four times that of comparable White males.
- A Black male has a 1 in 72 chance of being killed by a firearm before his 30th birthday; a White male has a 1 in 344 chance.
- Eight times as many White children and teens committed suicide by gun as Black children and teens.
- Males ages 15 to 19 are almost eight times as likely as females that age to commit suicide with a firearm.

Step Up and Take Action: We Can Protect Children and Teens from Gun Violence if Everyone Does His or Her Part

To confront America's deadly, historic romance with guns and violence and protect children from firearms in their homes, schools, communities and nation, you can:

1. Support Common Sense Gun Safety Measures

Because federal law requires criminal background checks *only* for guns sold through licensed firearm dealers, 40 percent of all firearms in the United States are purchased *without* a background check, including those bought at gun shows. Congress must enact legislation that closes the gun show loophole by requiring criminal background checks on those who purchase guns from unlicensed gun dealers. Six states require background checks on all firearm purchases and others require them only for handguns, but 35 states have no laws that affect the gun show loophole. Contact your elected officials to express your views on the need for gun measures to protect children. Call the White House at (202) 456-1414 or your Members of Congress at (202) 224-3121.

2. Remove Guns from Your Home

There are over 200 million firearms in the United States, including more than 65 million handguns. Reports have shown that the presence of guns in the home increases the risk of homicide and suicide. Removing guns from the home is one of the best ways to protect children and teens from gun deaths.

3. Stress Nonviolent Values and Conflict Resolution

Family violence is epidemic, child abuse and neglect are widespread, and children are being continuously exposed to television programming crammed with scenes of brutality. Concerned citizens along with schools and churches must organize nonviolent conflict resolution support groups in their communities. Excellent resources include: Dr. Deborah Prothrow-Stith's *Peace by Piece: A Guide for Preventing Community Violence* and "Violence Prevention Curriculum for Adolescents," as well as "Resolving Conflict Creatively" by Linda Lantieri, co-author of *Waging Peace in Our Schools*, available on the Educators for Social Responsibility website at www.esrnational.org.

4. Refuse to Buy or Use Products for Children and Teens That Glamorize Violence

Our culture frequently glamorizes guns and violence in movies, television shows, music and on the Internet. Many shows targeted at children contain violent themes and language. Protest and refuse to buy or use products that glamorize violence or make it socially acceptable or fun. Turn off violent programming and read with your children instead.

5. Raise Awareness of Child and Teen Gun Deaths and Injuries

What you can do:

- Urge local newspapers and radio and television stations to publish and broadcast photographs of children and teens killed in your community.
- Encourage the reading at your place of worship of the names of children and teens in your community killed by guns and publish their photos in your congregational bulletin.
- Write a letter to the editor or an op-ed piece about the tragic loss of young lives to gun violence.

The number of children and teens in America killed by guns in 2005 would fill 120 public school classrooms of 25 students each.

6. Invite Community Leaders to Witness the Effects of Gun Violence for Themselves

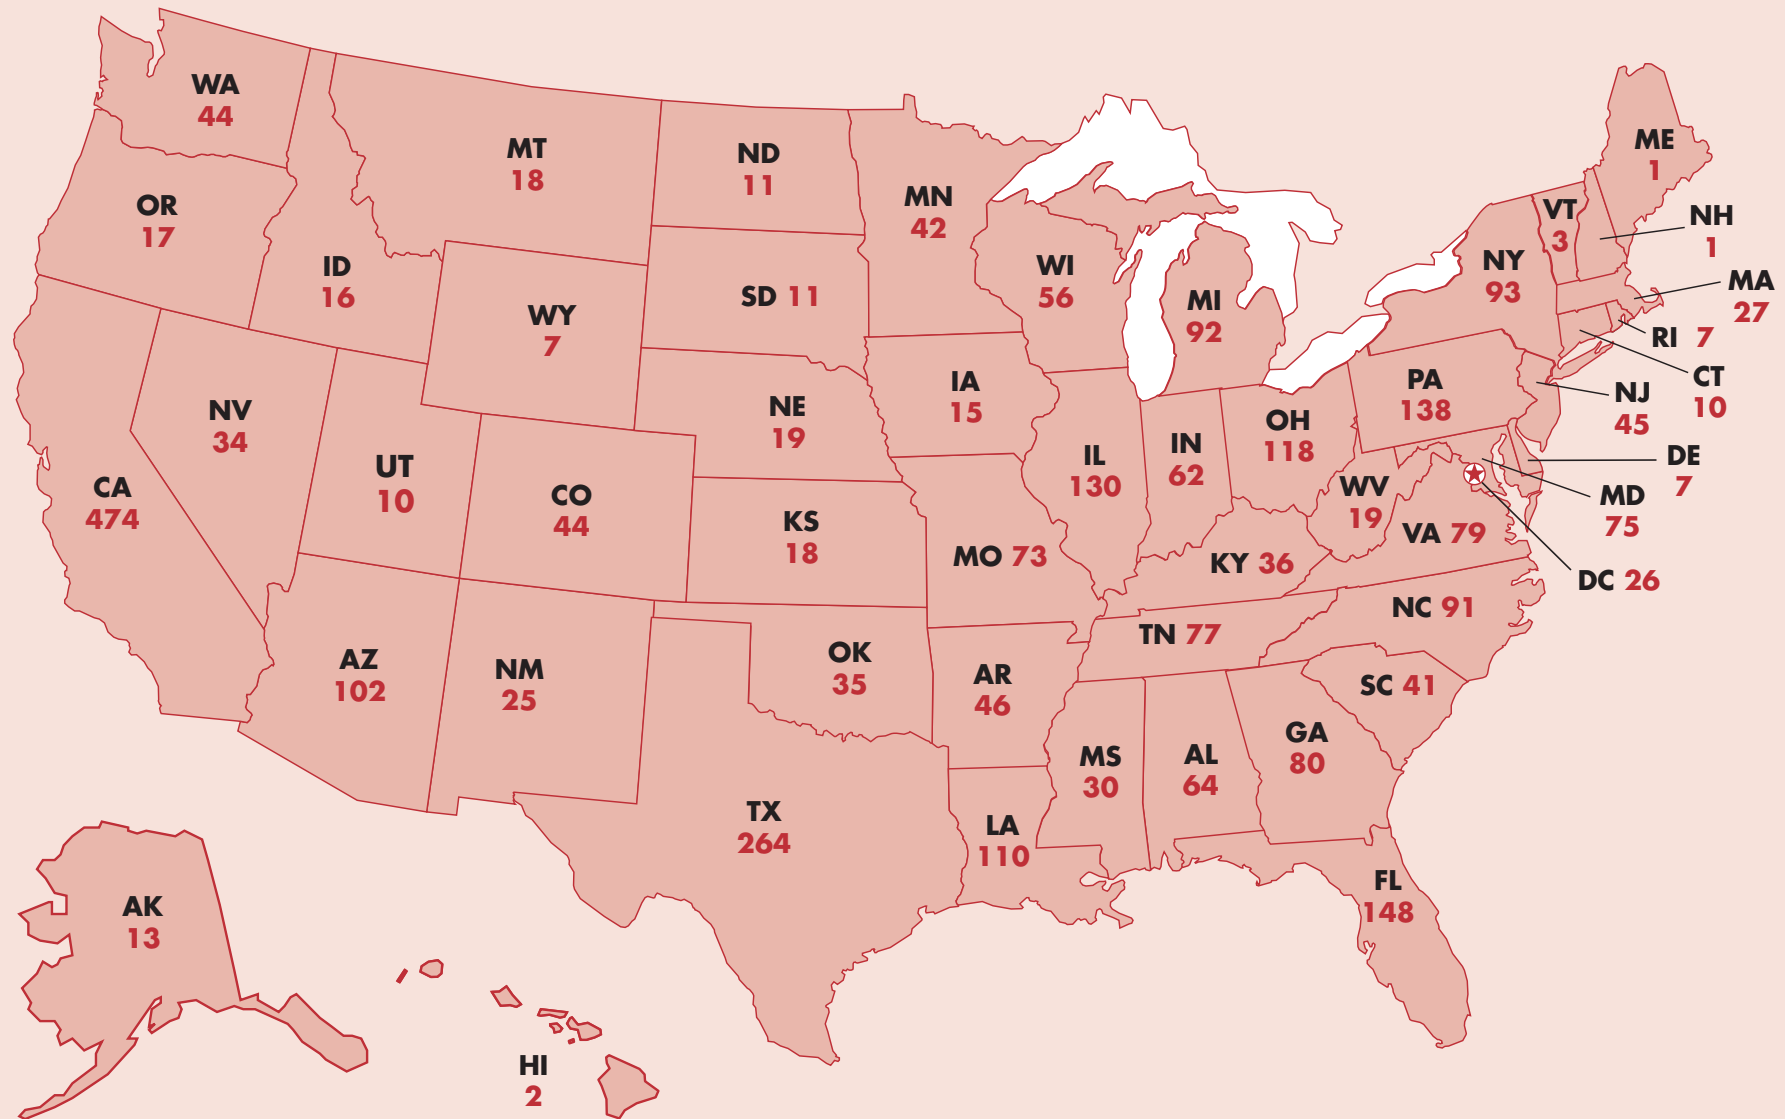

Organize a “Child WatchSM” visit for influential members of your community to see first-hand the effects of gun violence. Ask your local hospital to arrange visits with medical teams that can share their experiences of dealing with the victims and families impacted by gun violence.

7. Provide Children and Teens Positive Alternatives to the Streets Where They Can Feel Safe and Protected

Gangs, drugs and guns are available to many children seven days a week, 24 hours a day. We must offer positive alternatives and role models to children during after-school hours, weekends and summers. We need to open our congregational, school and community doors and engage them in purposeful activities. Check CDF’s website at www.childrensdefense.org/freedomschools for more information about the CDF Freedom Schools[®] reading and enrichment model, which includes nonviolence training.

¹Total firearm deaths and homicide firearm deaths exclude firearm deaths by legal (police or corrections) intervention.

Source: U.S. Department of Health and Human Services, National Center for Injury Prevention and Control, WISQARS, at <http://www.cdc.gov/nipc/wisqars/>, data accessed December 2005, January 2007 and February 2008. Calculations by Children's Defense Fund.

Firearm Deaths of Children and Teens, 2005

States with the Most and Fewest Child Gun Deaths

The eight states with the most firearm deaths of children and teens in 2005:

- 1. California**
- 2. Texas**
- 3. Florida**
- 4. Pennsylvania**
- 5. Illinois**
- 6. Ohio**
- 7. Louisiana**
- 8. Arizona**

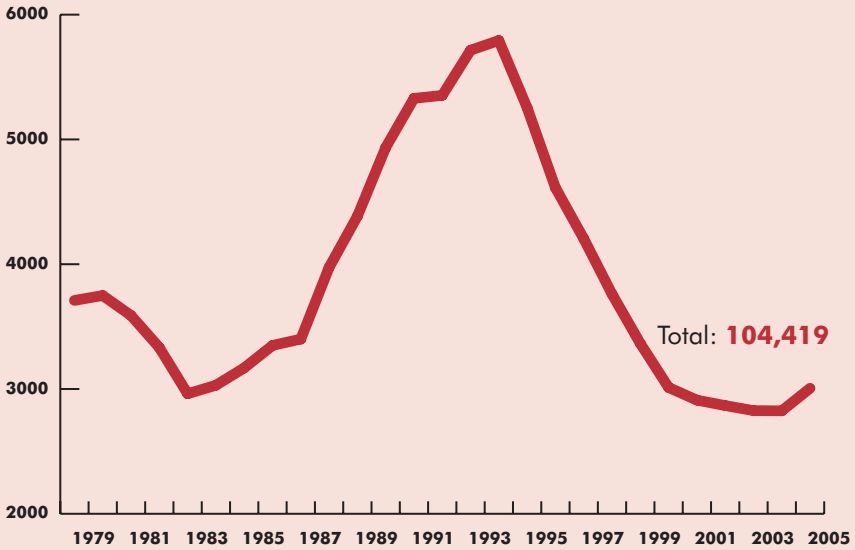

These states accounted for 1,484, or 49.4 percent, of all firearm deaths among children and teens in 2005.

The seven states with the fewest firearm deaths of children and teens in 2005:

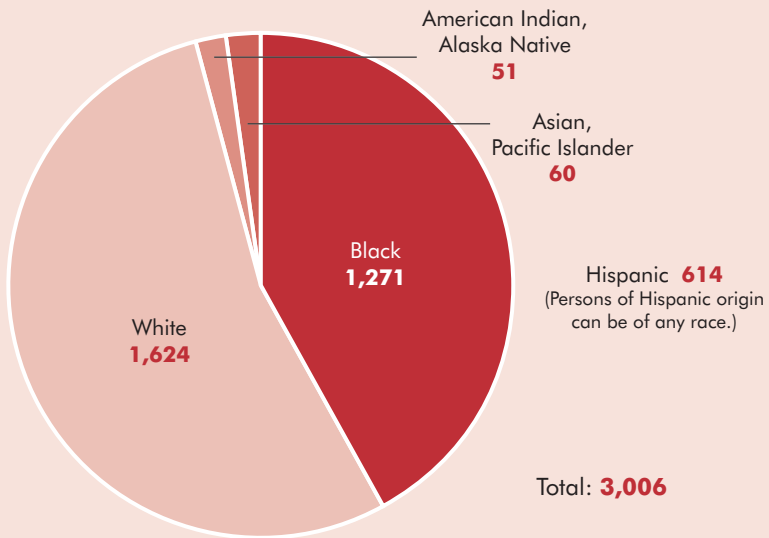

- 1. Maine**
- 2. New Hampshire**
- 3. Hawaii**
- 4. Vermont**
- 5. Delaware**
- 6. Rhode Island**
- 7. Wyoming**

These seven states accounted for 28 firearm deaths of children and teens in 2005.
