Take Action
Stop AIDS!

World AIDS Day-China, 2006

Tianjin • China
December 1-3, 2006
Sponsored by WHTS

www.aidsday2006.com
Meeting the challenge of HIV/AIDS has required significant increases in China’s national and provincial budgets. China’s annual national budget for HIV/AIDS has approximately increased 8 times from 2002 to 2005. The total central government budget shot up, 59 Provincial and local governments are also increasing their financial commitments to HIV/AIDS programs, grants from the central government and loans and donations from international organizations. China’s HIV/AIDS programs have also benefited from international resources. Such as the Global Fund to Fight AIDS, UNICEF-assisted health clinics in China program, Clinton Foundation etc.

**For China, For World, All For Human**

- To expand and intensify the work of anti-AIDS Movement in China, Asia, Africa, and beyond.
- To collect an endowment fund from all over the world to support HIV patients.
- To create a forum where innovative ideas of anti-AIDS are nurtured and supported.
- To integrate current global resources and efforts in control and prevention of AIDS epidemic.

5. Call for

A total of 114 provincial government officials and medical experts have gone to 38 villages in central Chinese Henan Province that have been hit by HIV/AIDS. They intend to work and live in the villages for a year.

Henan Province is probably the worst hit area in China for HIV/AIDS due to illegal blood selling. Several years ago illegal blood banks paid money to poor farmers for their blood donations, but lax hygiene standards led to many people becoming infected. It is reported that a survey last year revealed that 25,000 blood donors have tested HIV positive in the province, according to the provincial health authority.

The move is part of the government's efforts to contain the spread of the virus and help those already infected. The team members are from 38 provincial / regional government departments and 22 provincial medical organizations. The official assistance aims to help to establish and improve local medical treatment for HIV/AIDS sufferers. "The team will also try to prevent babies from being infected by mothers who suffer from HIV/AIDS," the official said. Furthermore, orphans of AIDS victims will receive free schooling.

It is reported that those sent last year to the villages will work with the second batch who arrived yesterday until the end of the month.

The China News Service reported that thanks to previous help from health workers in the villages, the annual average income there has increased by over 200 yuan (US$24) per person. Over 6,700 AIDS patients in the 38 villages have already had regular treatment.

The Henan provincial government has stepped up efforts to prevent the spread of the disease. A total of 232 million yuan (US$28 million) was invested last year in medical treatment and assistance to victims. The provincial government invested another 28 million yuan (US$3.4 million) early this year.

Sources with the Ministry of Health said there were around 130,000 confirmed cases of HIV/AIDS in China, however, the real figure is thought to be more than 800,000.
**Invitation letter**

Dear Friends and Colleagues,

The prevention of HIV infection and treatment of AIDS patients has become a major medical mission priority for global communities rather than a single organization's effort. The World High Technology Society (WHTS), a non-profit organization founded in Boston area, is calling all possible parties to participate in World AIDS Day-China, 2006, which will be held during December 1-3, 2006. The mission of this congress is to call for multinational efforts to initiative programs for education, special offerings, and direct services to the AIDS community in this region. In the past four years, WHTS has organized many international life science conferences in Pacific Asia rim, and is partnering with the local government and main stream societies across the world to support the medical development of this area. As invited by the local government and organizations, WHTS will further team up with different parties to take action in anti-HIV/AIDS campaigns, with a particular focus at the present on China where an increasing percentage of the cases are found.

To integrate worldwide resources to help millions of AIDS patients in this region and beyond, we are calling the international community to act more decisively in providing drug therapies that can make it possible for people to live productive lives despite HIV infection. We applaud the efforts of some pharmaceutical companies to reduce costs of drugs for developing countries, but supplies of affordable treatment are limited and still expensive.

We are also calling public awareness to meet the giving levels projected by the international funds to fight AIDS. We are currently organizing an extensive program of ongoing education for children in China who have lost their parents to AIDS. We are working with charity organizations across the World to become more effective in HIV/AIDS education and in equipping World AIDS Day-China as caregivers.

On World AIDS Day-China, 2006, we call upon all men and women in all societies to observe responsible, safe sexual practices, to avoid all forms of substance abuse, including those that can transmit HIV, and to avoid exposing others to infection should they contract the AIDS virus by blood selling.

We call upon nations rich and poor, and upon the international community to devote themselves more ardently to the control and eventual eradication of HIV/AIDS in this area and provide support for beyond.

We call upon all caring people to devote their caring and efforts, their gifts, and their service to HIV/AIDS prevention, care, and treatment.

---

Xiaodan Mei, Ph.D.
Executive Committee Member
World AIDS Day-China, 2006, Tianjin, China
About us

December 1st is World AIDS Day. Established by the World Health Organization in 1988, World AIDS Day serves to focus global attention on the devastating impact of the HIV/AIDS epidemic. Observance of this day provides an opportunity for governments, national AIDS programs, churches, community organizations and individuals to demonstrate the importance of the fight against HIV/AIDS.

With an estimated 39.4 million people worldwide living with HIV at the end of 2004, and more than 20 million people having died of AIDS since 1981, December 1st serves to remind everyone that action makes a difference in the fight against HIV/AIDS.

Chinese should be reminded that HIV/AIDS does not discriminate. With an estimated 840,000 to 1 million HIV-positive individuals living in China, and 1.32 percent new infections increased since last year. China, like other nations around the world is being affected by HIV/AIDS.

We encourage you to visit this Web site and download materials, posting information that provide HIV/AIDS statistics and the new World AIDS Day-China poster, to assist in your efforts to educate, motivate and mobilize our local community in the fight against HIV/AIDS!

Our Mission

Our mission is to integrate current global strategies in control and prevention of AIDS epidemic; to update research progress on the disease mechanisms and potential therapeutics; to demonstrate current anti-AIDS/HIV drug discovery products; to unify science and community efforts to secure access for All; and to focus on increasing public awareness and insights into local commitment, effective leadership, global accountability and actions facilitating the prevention and health care/medicare, education.

Who Should Attend

- International, Regional or Oversea Organizations
- Medical care and Scientific and Educational organizations
- Non-Governmental Organizations
- Commercial Department of Corresponding Enterprises
- Non-patent and Pharmaceutical R & D Companies
- Pharmacy Sale Department
- Labor Unions
- International and Domestic Media
- Charity and Foundations
- Community Organizations

Hosting Organization:

- World High Technology Society
- Tianjin Municipal People’s Government

Supporting Organization:

- Ministry of Science and Technology of China
- Ministry of Health People’s Republic of China
- Tianjin Science and Technology Committee
- National Disease Surveillance Centers-venereal Disease/AIDS Control and Prevention
- The National AIDS Control and AIDS Prevention Association
- Tianjin Economic - Technological Development Area (TEDA)
- China HIV Examination Center
- Tianjin Centers for Disease Control and Prevention
- Tianjin Centers for Disease Control and Prevention

I
n the late 1980s, the international AIDS epidemic spread to China through intravenous drug users in the border areas of southwestern China. But in the 1990s the epidemic moved into the center of rural China via an unhygienic blood donation scheme which infected tens of thousands of poor villagers, more women than men, who regularly sold blood in order to earn extra money. Unaware of their own infections, they passed HIV to their spouses and sometimes to their offspring. Many of these villagers, often both members of the couple, are now dying, even as a slow-to-start free national ARV treatment program gets underway. The numbers of infected persons is unknown, but some estimate the numbers to be between 1-2 million.

In some communities in central China there are scores of orphans and hundreds of sick and dying villagers. According to a recent statement by UNICEF China, China already has an estimated 78,000 AIDS orphans, many of them located in Henan Province and counties that border on Henan, Anhui, Hubei, and other central provinces. UNICEF estimates that between 150,000 and 250,000 additional children will be orphaned over the next five years as a result of AIDS.

Due to fear and misunderstanding about this deadly disease and its means of transmission, families and individuals with AIDS are often treated as social pariahs in their own communities. Orphanages and schools have been loath to admit children from families infected with AIDS. Some families and infected individuals have withdrawn from contact with others, making it even more difficult for them to obtain the help they need. Fortunately, the Chinese government has recently launched efforts to promote greater awareness and knowledge of the AIDS problems throughout societies and has pushed all levels of government to work openly to address this terrible problem. This year, the government started a program to supply free AIDS medicines to adults in the hardest hit areas and to supply small subsidies to families who have lost breadwinners to AIDS. The central government has mandated that children from AIDS-affected families should be allowed to attend school tuition-free and AIDS victims should be provided with free or heavily subsidized medical care in their local areas.

But the central government has not fully funded the mandated programs and local governments in the affected areas generally lack funds to do so. Some local officials are still reluctant to confront the problem openly. Thus local needs remain great and there is a paucity of funding and organizational capacity to begin to meet these needs.

AIDS in China 'Escalating Out of Control' Especially in Henan

T
he AIDS epidemic is now showing every sign of escalating out of control. In Henan, one of the worst affected provinces, more than 14,500 HIV carriers, most poor farmers, became infected after other estimates of HIV in the province put the figure much higher. Throughout China, the official estimate of people living with HIV is only 840,000, but experts think it more likely to be between 1 and 1.5 million. This follows the introduction of new laws to target the spread of AIDS and outlaw discrimination against victims of infectious diseases, and a grant of $32 million from the Global Fund to provide antiretroviral. According to UNICEF, around 78,000 children have lost parents to AIDS in the country.
TAKE ACTION
IN CHINA

A Children await registration for immunizations at one of the many UNICEF-assisted health clinics in China.

B The Peer Education Project in Xinjiang Province run by the Chinese Red Cross with support from the Australian Red Cross, focuses on HIV/AIDS prevention work focusing particularly on youth, intravenous drug users and sex workers. With the Ministry of Health estimating that 600,000 people are already carrying the virus, education and awareness campaigns are vital if China is to contain an HIV/AIDS epidemic. The AIDS programme in Yunnan trains and provides care and support to the people living with HIV/AIDS. The success of these programmes has led to the implementation of additional initiatives in Guangxi, Hainan, Fujian and Jilin provinces.

C An investigation into the state of the AIDS epidemic in China, by China’s Ministry of Health, showed that the number of Human HIV carriers in China has reached 840,000 people, of which 80,000 are AIDS patients having developed the symptoms. Some experts suggested the figure could be even higher, 1 million to 1.5 million. The spread of AIDS is growing rapidly, with the country facing both lack of medicine and insufficient awareness of the disease.

D A Chinese student attaches a well-wisher card for HIV-positive people to a string as China marks World AIDS Day in Beijing, China. Six Chinese volunteers received two milligrams of AIDS DNA vaccine, starting the second phase of clinical test of China's self-developed AIDS vaccine in south China's Guangxi Zhuang Autonomous Region.

E Hong Kong movie star Jackie Chan, a goodwill ambassador for UNAIDS/UNICEF, poses in Cambodia. Many artists in China have contributed their care and passion to the work of HIV/AIDS; Hong Kong movie star Jackie Chan has been announced a goodwill ambassador for UNAIDS/UNICEF; Well-known Chinese film star Pu Cunxin, who is the China's AIDS prevention and publicity ambassadors, often attends the anti-HIV/AIDS activities; Jiang Wenli, also a famous Chinese actress, is passionate and helpful with the anti-HIV/AIDS work in many ways, such as participate in different kinds of international activities against HIV/AIDS.
Media Partners

We make it born! You make it known!

As a public awareness campaign with great social impact and epoch significance, World AIDS Day-China, 2006 will depend heavily on media without a question. Your efforts will greatly promote the actions and public awareness for AIDS control in this area. Organizing Committee of World AIDS Day-China, 2006 has always strived to establish sound cooperation with media partners and your support will definitely make contribution to this campaign.

Exhibitions:
- High-Tech Exhibition Region.
- Media, Charities, Foundation, GO AND NGO Region.
- AIDS Photos and Posters show for those most affected regions.

Speakers/Papers/Abstracts/Posters

World AIDS Day-China, 2006 is the unprecedented historical commonweal in China, in the hope of providing a cross-cultural, open and free forum for the exchange of ideas, research and knowledge in order to arouse public awareness of anti-HIV/AIDS and promote international collaboration in combating with HIV/AIDS. So, we anticipate and welcome you and your colleagues to offer your speech in the coming grand event next year. Your speech will be expected to embrace all relevant research findings in HIV/AIDS field, you can make speech from the view of pathology of HIV, also may refers to prevention and treatment of HIV/AIDS in your report, or give your talk about clinical care for HIV patients. Lecture on Anti-HIV drug discovery will also be expected. You are also welcomed to submit your abstracts (overviews) which are limited to 500 words in length and must be presented on a single page. Time allotted for oral presentations will be 25 to 40 minutes, as determined by the committee. Presentations must present new development in basic science on HIV/AIDS, control and prevention on HIV/AIDS, also in clinical research, even anti-HIV/AIDS drug discovery, etc.

Sponsorships & Donations

The Conference is the most important milestone achievement in Anti-AIDS/HIV in 21st century. Many foundations, non-profit organizations, well-leading scientists will team with WHTS to co-sponsor the activities on AIDS public awareness and fundraising. These activities are designed with the purpose to prevent the epidemic of HIV and to reduce its impact on people.

The Expected Fund will be used for
- Educating, counseling, and preventing HIV infection to more people.
- Improving living standard of those infected people, especially for Children with clothes, food, entertainment toys, and computers, etc.
- Providing PWA with therapeutic assistance such as diagnostic kits, medicine and etc.
- Building a shelter for those orphans who desperately need help for a home, etc.

And your donations are also expected, such as:
- Anti-HIV drugs.
- Assisting tools for prevention and treatment on HIV/AIDS.
- Essential commodities for living.
- Books, clothes, food, entertainment toys, and computers, etc.

To initiate more charity activities to provide diverse assistances to improve living qualities and community support to pediatric and women AIDS patients. Every penny or any charitable gift raised will be 100% delivered to those patients in urgent need.

Please show your intelligence to all of us; please express your caring heart and concerns to those people living with HIV/AIDS; please deliver your action against HIV/AIDS at that historical moment of that landmark grand congress.

</tbody>
</table>
December 2, 2006 (Saturday)—December 3, 2006 (Sunday)

9:00-17:00
Scientific Program
The Program Includes Five Tracks
Track A: Basic Science and Research Progress
Including: HIV Life Circle, Replication, Infections, the Host Immune Responses, and a Greater Understanding of HIV Pathogenesis, etc.

Track B: Anti-AIDS/HIV Drug Discovery

Track C: Clinical Research, Treatment and Care
Highlights:
• The Latest Research Findings of the Characteristics and Clinical Course of HIV Infection, Diagnosis and Treatment of Opportunistic Infections and Other HIV-related Disorders, Antiretroviral Therapy and Immunotherapy.
• Aspects of Medicine and Related Health Issues to be Addressed Include Pediatrics, Obstetrics and Gynecology and Dentistry. Best Practices in Care and Treatment Issues Related to Resource-limited Settings will be Emphasized.

Track D: Epidemiology and Prevention
Highlights:
• Progress in the Collection, Analysis and Use of Data that Describe the distribution of HIV and the Behaviors that spread it. The Effective Use of Epidemiological Data in Influencing National and Local Responses.
• Surveillance Methods, Observational Studies and Experimental Studies will be presented.
• The focus will be on the design and evaluation of HIV Prevention Interventions as well as on the natural History of Infection and Demographic Impact of HIV.
• Examine Methodological Advances in Epidemiology and Surveillance.

December 2, 2006 (Sunday)
18:30-20:30 TV Show of AIDS Documentary

December 3, 2006 (Monday)
17:00-17:30 Close and Signing Ceremony

December 4, 2006 (Tuesday)
09:00-17:00 Tour in Tianjin and Beijing

Introductions To Exhibition

- **Popularization on AIDS Basic Science Region**: Show some necessary HIV/AIDS basic knowledge for public, including HIV pathology, main transmission pathways, some methods for prevention and treatment and some touching HIV patient photos from the world' most affected areas.

- **Media, Charities, Foundation, GO AND NGO Region**: All kinds of well-known organizations from both domestic and overseas will devote their caring heart through their previous contribution exposition for social commonweal career; some pamphlets/books exhibition; from photos exhibition, you will see that they have done lots for HIV/AIDS patient not only from physically but also from mentally.

- **Aids Posters Show for Those Most Affected Regions**: from this exhibition, you will see some original posters from world-famous scientists related to any progress on current research in anti-HIV/AIDS.

- **High-Tech Exhibition Region**: It embraces anti-HIV/AIDS drug research and development, assisting medical care apparatus for HIV/AIDS treatment, advanced medical health care for patient living with HIV/AIDS, assisting tools for prevention and treatment on HIV/AIDS, Corresponding epidemic, Resource-Sharing for epidemiology information and service, Patent technology in this field, etc.

A Survey of Tianjin

At the center of the Bohai Sea Economic Circle along the west coast of the Pacific Ocean, Tianjin backs onto North China, Northwest China and Northeast China and faces Northeast Asia, and it is only 120 km away from Beijing, to the capital of China. Thanks to such a favorable location, Tianjin enjoys great advantages and provides a channel for over a dozen provinces and cities in the north of China to communicate with foreign friends. Tianjin is also the largest port city in the north. Tianjin is one of the four Municipalities in China, it has long history to open to the western countries. You can enjoy the cultures and modern lifestyle of big cities, but relative leisure pace in the city. Meanwhile, it is easy for you having a tour in Beijing.

Beijing Travel

Popular Beijing travel enable you to explore the highlights of China's ancient capital - Beijing with its illustrious historical heritages from ancient times. Beijing prides itself on its abundant tourist resources. The city has more than 200 scenic spots available for tourists. It is home to the Forbidden City, the world's largest royal residence, the Temple of Heaven where Chinese emperors worshiped heaven, the Summer Place, the Royal Garden, the Great Wall at Badaling, Mutianyu and Simatai and the world's largest courtyard Prince Gong's Residence, and so on.
About WHTS

World High Technology Society (WHTS) is a non-profit, and non-political organization. Its mission is to promote multilateral and all dimensional collaborations in IT, biotechnology, new material sciences and integration of Photon-Electron-Machinery etc., which provides a new bridge for high tech entrepreneurship, and offers best services for across-cultural frontier scientific information exchanges.

In the past four years, WHTS has organized many international life science conferences in Pacific Asia Rim, and is partnering with the local government and main stream societies in this area to support the medical development of this area, such as the WHTS’ 1st-3rd Annual Congress of International Drug Discovery Science and Technology (IDDST), World DNA and Genome Day, Life Spring Forum, etc. As invited by the local government and organizations, WHTS will further team up with different parties to take action in anti-HIV/AIDS campaign, with a particular focus at the present on China where an increasing percentage of the cases are found.

More than 800 scientists attended the 3rd Life Spring Forum held in Dalian in May, 2004. Mayor of Dalian met laureates of the delegation.

WHTS’ 2nd IDDST congress was held in Beijing, Dalian and Nanjing, China, it attracted more than 2,000 attendees.

WHTS’ 3rd IDDST congress was held on Oct 17 in Dalian. About 600 scientists and entrepreneurs joined us.

2005 World DNA and Genome Day had invited 5 Nobel Prize Laureates and about 200 speakers offered the wonderful lectures and more than 5,000 attendees joined the program.

The organizing committee of 2005 World DNA and Genome Day invited all of speakers to attend the Welcoming Banquet and enjoyed the grand performance.

Till now, 15 Nobel Prize Laureates had participated in WHTS's programs, more than 10 leading scientists from different countries, and about 300 international bio-medical scientists and executives gathered together for exchanging information on updated research progress. More than 10,000 people physically attended the conference sponsored by WHTS.
